

Sexual and Reproductive Health

The New Hampshire Public Health Association (NHPHA) holds that age appropriate, consensual sexual expression is normal, healthy human behavior. In order to assist individuals to maintain their sexual and reproductive health and reduce the risk of sexually transmitted diseases and unwanted pregnancy, the NHPHA supports efforts that:

- Ensure access to comprehensive age appropriate, evidence based information and education on sexual and reproductive health; and
- Provide access to high quality, client centered reproductive health care that recognizes the privacy of the patient/provider relationship
